PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate and data professional with hands-on experience building ETL/ELT pipelines, dimensional data models, and BI dashboards. Proficient in SQL, Python, Power BI, and Tableau with proven ability to translate complex datasets into actionable business insights. Experienced developing data warehouse solutions, automating batch processes, and collaborating cross-functionally to deliver end-to-end reporting solutions. U.S. Naturalized Citizen. no sponsorship required.

EDUCATION

University of Wisconsin – River Falls | River Falls, WI

- Bachelor of Science in Computer Science and Information Systems | December 2024

Relevant Coursework: Database Systems, Data Science, Software Engineering, Object-Oriented Programming, Data Structure Algorithms

CERTIFICATIONS

- Google Data Analytics
- IBM Data Science Professional
- AWS Cloud Practitioner Essentials , aws cloud practitioner certification exam(soon)

TECHNICAL SKILLS

SQL & Databases: PostgreSQL, MS SQL Server, MySQL, Google BigQuery (familiar), Oracle SQL, CTEs, Window Functions, Indexes, Stored Procedures, Query Optimization

ETL / Pipeline: ETL/ELT Design, Python (Pandas, NumPy, Scikit-learn), Data Cleaning, Data Integration, Relational Database Design, Dimensional Modeling (Star/Snowflake)

BI & Visualization: Power BI (DAX), Tableau, Excel (Pivot Tables, Power Query, VBA/Macros), Matplotlib, Seaborn, Jupyter Notebooks, KPI Dashboards

Cloud & DevOps: AWS (EC2, S3, Lambda), Git/GitHub, Docker, CI/CD Pipelines, Azure DevOps, Jira, Agile/Scrum

Data Concepts: Data Warehousing, Data Modeling, Data Governance, Metadata Management, Data Quality, Statistical Analysis, Exploratory Data Analysis (EDA)

Languages: Python, SQL, JavaScript, TypeScript, R (Tidyverse), Bash Scripting

WORK EXPERIENCE

Development Intern | A Better Road Foundation

- Designed, developed, and deployed end-to-end web platform; analyzed datasets to support data-informed email and web engagement strategies.
- Built custom interactive elements using JavaScript (Velo), ensuring data integrity and responsive user experience across platforms.
- Integrated Google Analytics and implemented SEO best practices, providing leadership with data-driven insights on user engagement KPIs.
- Acted as sole technical liaison between stakeholders and IS team, gathering requirements and translating organizational goals into functional solutions.

PROJECTS (github.com/AbenezerYBekele)

Automated ETL & ML Pipeline: Titanic Survival & Drug Classification | GitHub

- **Data Quality & Wrangling:** Built a robust ETL pipeline for the Titanic and Drug-Classification datasets, handling missing values, feature scaling, and normalization to ensure model-ready data.
- **Predictive Analytics:** Developed and deployed machine learning models (Random Forest, Decision Trees) to predict outcomes, achieving high accuracy through hyperparameter tuning.
- **Unit Testing:** Applied source control (Git) and modular coding practices to ensure the pipeline was reusable and maintainable.

Public Interest Data Pipeline: Chicago Urban Analysis | GitHub

- **Complex Dataset Handling:** Engineered a data pipeline to process diverse urban datasets (socio-economic, education, and population) to identify service gaps in metropolitan areas.
- **Analysis & Modeling:** Utilized Python and Jupyter to clean and normalize "messy" public data, creating a clean core system for secondary analysis.
- **Visualization:** Developed automated reporting modules to communicate technical demographic trends to non-technical stakeholders.

Relational Database Design & SQL Optimization (COVID-19) | GitHub

- **Advanced SQL:** Authored 12+ complex SQL queries using Window Functions, CTEs, and Self-Joins to transform raw global health data into structured analytical views.
- **Performance Tuning:** Optimized query execution by implementing strategic indexing and stored procedures, improving data retrieval speeds for regional summary reporting.
- **Data Governance:** Applied NULL filtering and data validation constraints to maintain high data integrity standards across all interfaces.
