PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building ETL/ELT pipelines, deploying machine learning models, and integrating Generative AI APIs (Google Gemini Pro) into production workflows. Proficient in Python, SQL, JavaScript/TypeScript, and cloud services (AWS, Docker, CI/CD). Demonstrated ability to design relational databases, build RAG-style data ingestion pipelines, automate metadata extraction from unstructured data, and translate complex technical solutions for non-technical stakeholders. Experienced with LLM-powered workflow automation and agentic AI. U.S. Naturalized Citizen . no sponsorship required.

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, Scikit-learn, Matplotlib), SQL (PostgreSQL, MS SQL Server, MySQL), JavaScript, TypeScript, R, Bash
Data Engineering	ETL/ELT Design, Data Ingestion & Transformation, Pipeline Automation, Dimensional Modeling (Star/Snowflake), dbt (learning), Airflow (familiar), SSIS (aware)
Cloud & DevOps	AWS (EC2, S3, Lambda, API Gateway), Docker, CI/CD Pipelines, Azure DevOps, Git/GitHub, Linux, Agile/Scrum, PyTest, Jira
Databases	PostgreSQL, MS SQL Server, MySQL, MongoDB, DynamoDB, Google BigQuery (familiar), Snowflake (familiar), CTEs, Window Functions, Stored Procedures, Query Optimization
GenAI & LLMs	Google Gemini Pro (production), LLM Integration, RAG Pipeline Design, Prompt Engineering, Agentic Workflow Automation, Metadata Extraction from Unstructured Data
BI & Visualization	Power BI (DAX), Tableau, Matplotlib, Seaborn, ggplot2, Excel (PivotTables, Power Query, VBA)
Data Governance	HIPAA Awareness, Data Privacy Compliance, NULL Filtering, Metadata Management, Data Validation, Responsible AI Principles

EDUCATION

University of Wisconsin – River Falls | River Falls, WI

- **Bachelor of Science in Computer Science and Information Systems | December 2024**

Relevant Coursework: Database Systems, Data Science, Software Engineering, Object-Oriented Programming, Data Structure Algorithms

CERTIFICATIONS

- IBM data science professional certificate
- Docker Foundations Professional Certificate
- AWS Cloud Practitioner (In Progress)
- Google Data Analytics Professional Certificate (In Progress)

WORK EXPERIENCE

Development Intern | A Better Road Foundation **2025**

- Designed and deployed an end-to-end data reporting platform; analyzed engagement datasets using Google Analytics to surface KPI insights directly informing leadership decisions on content and email strategy.
- Acted as sole technical liaison between non-technical stakeholders and the IS team. gathered requirements, documented all data interfaces, and maintained data confidentiality throughout the project lifecycle.
- Built repeatable, scalable analytics reporting workflows (JavaScript/Velo) reducing manual processing overhead and improving data pipeline reliability for ongoing organizational use.
- Implemented SEO best practices and established automated web data reporting workflows, enabling leadership to monitor user engagement KPIs continuously.

PROJECTS

FinTracker: AI-Powered Financial API | GitHub

Node.js, PostgreSQL, Google Gemini Pro, Docker

- Integrated Google Gemini Pro Vision API to automate metadata extraction from unstructured images, building an ETLstyle RAG data ingestion pipeline aligned with LLM/agentic workflow development.
- Deployed a secure RESTful API with JWT authentication and role-based access control handling live financial transaction data; containerized with Docker for scalable, consistent deployment.
- Modeled relational schemas in PostgreSQL for data integrity and scalability; applied data security best practices across the full stack.

Automated ETL & ML Pipeline: Titanic Survival & Drug Classification | GitHub

Python, Scikit-learn, Pandas, PyTest, Jupyter

- Built a robust ETL pipeline handling missing values, feature scaling, and normalization; developed and evaluated end-to-end ML models (Random Forest, Decision Trees, Logistic Regression) with hyperparameter tuning.
- Applied unit testing (PyTest), Git source control, and modular coding practices ensuring pipeline reusability and maintainability aligned with CI/CD and MLOps best practices.

Relational Database Design & SQL Optimization (COVID-19) | GitHub

SQL, MS SQL Server, CTEs, Window Functions

- Authored 12+ production-quality SQL queries using Window Functions, CTEs, and Self-Joins to transform raw global health data into structured analytical views; implemented strategic indexing and stored procedures for performance tuning.
- Applied data governance standards including NULL filtering, metadata management, and documented data interfaces for auditability, replicating EDW data modeling workflows.

Business Intelligence: Power BI Dashboard Portfolio | GitHub

Power BI, DAX, SQL

- Built interactive KPI dashboards connected to live SQL databases; performed end-to-end ETL including data cleansing, validation, transformation, and query optimization via indexing and stored procedures.
- Designed DAX measures for trend analysis, variance tracking, and pattern identification enabling data-driven decision-making across business units.

Healthcare Analytics: Medicaid Coverage EDA | GitHub

Python, Pandas, Jupyter Notebooks

- Conducted statistical analysis on large-scale Medicaid enrollment datasets applying EDA techniques to surface healthcare coverage patterns and demographic trends with HIPAA-aligned data handling practices.
- Documented data sourcing methodology and produced interpretive reports communicating findings clearly to non-technical stakeholders

Public Interest Data Pipeline: Chicago Urban Analysis | GitHub

Python, Pandas, Jupyter Notebooks

- Engineered a data pipeline to ingest and process diverse public datasets (socio-economic, education, population), cleaning and normalizing messy source data for structured downstream analysis.
- Developed automated reporting modules communicating demographic trend findings to non-technical stakeholders, establishing repeatable pipeline outputs for ongoing organizational use.

Minneapolis Rental Licenses Time-Series Analysis | GitHub

R, ggplot2, dplyr, lubridate

- Engineered date-based features with lubridate to enable multi-year time-series analysis of rental license issuance patterns across Minneapolis neighborhoods; created ggplot2 visualizations communicating seasonal trends.

Retail Intelligence: Coffee Shop Sales Dashboard | GitHub

Excel, PivotTables, Power Query

- **Analyzed** large-scale transaction datasets to surface peak revenue periods, customer purchasing behavior, and product margin trends to support operational planning.
- **Engineered** Excel Macro-based KPI dashboards (PivotTables, Power Query, VBA) for executive-ready reporting; applied advanced data validation ensuring 100% accuracy in financial reporting outputs.
