PROFESSIONAL SUMMARY

Analytically driven Data Analyst and U.S. Citizen with hands-on experience in building automated reporting workflows and analyzing complex datasets to support strategic decision-making. Proficient in R, Python, and SQL for trend analysis, outlier detection, and process improvement. Experienced in collaborating with cross-functional teams to translate technical data into actionable insights. Strong foundation in data integrity, security, and compliance protocols essential for high-stakes healthcare and government contracting environments.

EDUCATION

University of Wisconsin – River Falls | River Falls, WI

- **Bachelor of Science in Computer Science and Information Systems | December 2024**
  Relevant Coursework: Database Systems, Data Science, Software Engineering, Object-Oriented Programming, Data Structure Algorithms

CERTIFICATIONS

- IBM data science professional certificate
- Docker Foundations Professional Certificate
- AWS Cloud Practitioner (In Progress)
- Google Data Analytics Professional Certificate (In Progress)

WORK EXPERIENCE

Development Intern | A Better Road Foundation 2025

- Gathered business requirements from stakeholders to design scalable data solutions, ensuring 100% alignment with organizational goals and contract requirements.
- Analyzed operational datasets using Google Analytics to identify KPI trends and patterns, recommending process improvements that enhanced reporting efficiency.
- Built automated dashboard solutions using JavaScript/Velo, reducing manual reporting effort and ensuring data accuracy across departments.
- Served as a primary liaison between technical teams and non-technical leadership, delivering executive-ready visualizations and actionable insights.
- Identified workflow inefficiencies and implemented data-driven improvements to streamline internal reporting.

TECHNICAL SKILLS

Programming & Databases:	SQL (PostgreSQL, MS SQL Server), R (Tidyverse, ggplot2), Python (Pandas, NumPy, Scikit-learn), Snowflake/Databricks (Exposure), Bash.
BI & Visualization	Power BI (DAX), Tableau, Excel (Power Query, VBA/Macros, PivotTables), SAP Business Objects (Familiarity).
Analytics:	Statistical Data Analysis, Trend Analysis, Root Cause Analysis, Fraud & Outlier Detection, Data Validation, ETL/ELT, Data Governance.
Collaboration:	Agile/Scrum, Git/GitHub, Azure DevOps, Technical Documentation, Stakeholder Management, MS O365 (Expert Excel/PowerPoint).

ANALYTICAL PROJECTS

Relational Database Design & SQL Optimization (COVID-19) | GitHub

SQL, MS SQL Server, CTEs, Window Functions

- Relevance: Clinical/Public Health Data Analysis & Integrity
- Authored 12+ complex SQL queries using CTEs and Window Functions to transform raw public health data into structured reporting views.
- Conducted root cause analysis and data validation to ensure 100% reporting accuracy and data integrity, mirroring protocols required for CMS/Medicare reporting.
- Applied data governance standards, including NULL filtering and validation constraints, to safeguard dataset quality.

Public Interest Data Pipeline: Socio-Economic Analysis | GitHub

Python, Pandas, Jupyter Notebooks

- Relevance: Population Health & Socio-economic Trend Mapping
- Engineered automated ETL pipelines in Python to process diverse datasets (socio-economic, education, and population), supporting operational analysis.
- Cleaned and normalized large-scale datasets to improve data quality for downstream analytics, identifying inconsistencies through rigorous validation processes.
- Developed reporting modules that communicated demographic trends to stakeholders, aiding in strategic regional planning.

Business Intelligence: Power BI Dashboard Portfolio | GitHub

Power BI, DAX, SQL

- Relevance: Strategic Dashboarding & Outlier Identification
- Built interactive KPI dashboards connected to SQL databases, enabling real-time monitoring of performance metrics.
- Developed DAX measures for variance tracking and forecasting, allowing leadership to identify outliers and opportunities for intervention.

Retail Intelligence: Coffee Shop Sales Dashboard | GitHub

Excel, PivotTables, Power Query

- Analyzed operational sales datasets to identify peak demand periods, purchasing behavior trends, and product performance metrics supporting business planning initiatives.
- Developed automated KPI dashboards using Excel PivotTables, Power Query, and VBA to improve operational visibility and reduce manual reporting processes.
- Created executive-ready reports and visualizations communicating actionable insights to non-technical stakeholders.
- Applied advanced data validation and transformation techniques ensuring reporting accuracy and consistency.
