PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate with hands-on experience designing and building ETL/ELT pipelines, working with large relational datasets in MS SQL Server, and developing relational data models and data quality validation frameworks. Proficient in Python and SQL, including complex queries, stored procedures, CTEs, and window functions. with exposure to Snowflake, dbt, Airflow, and Azure Data Factory. Familiar with HIPAA data privacy requirements and healthcare data environments. Experienced collaborating cross-functionally to translate business reporting needs into scalable data solutions for downstream analytics users and Data Science teams. Eager to support an Enterprise Data Warehouse and contribute to cloud modernization initiatives in a missiondriven healthcare environment. U.S. Naturalized Citizen , no sponsorship required.

TECHNICAL SKILLS

- **SQL & Databases :** MS SQL Server · PostgreSQL · MySQL · CTEs · Window Functions · Stored Procedures · Query Optimization · Indexing · Relational Data Modeling
- **ETL / ELT Pipelines :** ETL/ELT Design · Data Ingestion · Data Transformation · Pipeline Automation · SSIS (aware) · SQL Agent (aware) · Azure Data Factory (aware) · Airflow (familiar)
- **Cloud & Warehousing :** Snowflake (familiar) · Google BigQuery (familiar) · AWS (EC2, S3, Lambda) · dbt (learning) · Cloud Modernization · On-prem → Cloud Migration
- **Data Quality :** Data Validation · NULL Filtering · Metadata Management · Data Integrity · Unit Testing (PyTest) · HIPAA Awareness · Data Governance
- **BI & Reporting :** Power BI (DAX) · Tableau · Excel (Pivot Tables, Power Query, VBA/Macros) · Matplotlib · Seaborn · Jupyter Notebooks · Downstream Analytics Support
- **Programming :** Python (Pandas, NumPy, Scikit-learn) · R (Tidyverse, dplyr) · JavaScript · Bash Scripting
- **DevOps & Process :** Azure DevOps · Git/GitHub · CI/CD Pipelines · Docker · Linux · Jira · Agile/Scrum · Code Reviews · Technical Documentation

EDUCATION

University of Wisconsin – River Falls | River Falls, WI

- **Bachelor of Science in Computer Science and Information Systems | December 2024**
  Relevant Coursework: Database Systems, Data Science, Software Engineering, Object-Oriented Programming, Data Structure Algorithms

CERTIFICATIONS

- IBM data science professional certificate
- Docker Foundations Professional Certificate
- AWS Cloud Practitioner (In Progress)

WORK EXPERIENCE

Development Intern | A Better Road Foundation **2025**

- **Designed and maintained** end-to-end data reporting pipelines for web engagement datasets, ensuring data accuracy and consistency across all analytics deliverables.
- **Analyzed** KPI data in Google Analytics and produced structured reports for leadership — translating raw behavioral data into actionable business insights.
- **Acted** as sole technical liaison between non-technical stakeholders and the IS team; gathered requirements, documented all data interfaces, and maintained data confidentiality throughout the project lifecycle.
- **Built** repeatable, scalable analytics reporting workflows that reduced manual processing overhead and improved data pipeline reliability for ongoing organizational use.

PROJECTS

Business Intelligence: Power BI Dashboard Portfolio | GitHub

Power BI, DAX, SQL

- **Built** interactive KPI dashboards connected to live SQL databases, supporting downstream reporting users with real-time visibility into business performance metrics.
- **Performed** full ETL, data cleansing, validation, transformation, and loading, with query optimization via indexing and stored procedures; documented data flows to support cross-functional handoff.
- **Designed** DAX measures for trend analysis, variance tracking, and pattern identification , enabling data-driven decision-making across business units.

Retail Intelligence: Coffee Shop Sales Dashboard | GitHub

Excel, PivotTables, Power Query

- **Analyzed** large-scale transaction datasets to surface peak revenue periods, customer purchasing behavior, and product margin trends to support operational planning.
- **Engineered** Excel Macro-based KPI dashboards (PivotTables, Power Query, VBA) for executive-ready reporting; applied advanced data validation ensuring 100% accuracy in financial reporting outputs.

Relational Database Design & SQL Optimization (COVID-19) | GitHub

SQL, MS SQL Server, CTEs, Window Functions

- **Authored** 12+ production-quality SQL queries against large health datasets using Window Functions, CTEs, and Self-Joins to transform raw data into structured analytical views , directly replicating EDW data modeling workflows.
- **Implemented** data governance standards including NULL filtering, strategic indexing, and stored procedures; documented all data interfaces for auditability and maintainability.
- **Built** multi-metric regional summaries (SUM, AVG, COUNT DISTINCT) and tracked rollout trends through date-based time-series analysis in SQL , producing reporting ready datasets for downstream analytics.

Titanic Survival Prediction | GitHub

Python, Scikit-learn, Pandas, Matplotlib, Seaborn

- Performed end-to-end data wrangling handling missing values, feature engineering, and normalization; built and evaluated classification models (Logistic Regression, Random Forest) with visualizations communicating findings to non-technical audiences.

Minneapolis Rental Licenses Time-Series Analysis | GitHub

R, ggplot2, dplyr, lubridate

- **Engineered** date-based features with lubridate to enable multi-year time-series analysis of rental license issuance patterns across Minneapolis neighborhoods.
- **Created** ggplot2 visualizations communicating seasonal trends and licensing volume patterns to support data-driven decisionmaking in a local market context

Public Interest Data Pipeline: Chicago Urban Analysis | GitHub

Python, Pandas, Jupyter Notebooks

- **Engineered** a data pipeline to ingest and process diverse public datasets (socio-economic, education, population) cleaning and normalizing messy source data for structured downstream analysis.
- **Developed** automated reporting modules communicating demographic trend findings to non-technical stakeholders, establishing repeatable pipeline outputs for ongoing organizational use.

Healthcare Analytics: Medicaid Coverage EDA | GitHub

Python, Pandas, Jupyter Notebooks

- **Conducted** statistical analysis on large-scale Medicaid enrollment datasets, applying exploratory data analysis techniques to surface healthcare coverage patterns and demographic trends — directly relevant to healthcare data environments like Moda's EDW.
- **Applied** HIPAA-aligned data handling practices throughout; documented data sourcing methodology and produced interpretive reports communicating findings clearly to non-technical stakeholders
