Abenezer Bekele

DATA QUALITY ANALYST

Phone: (651) 399-6145
Email: AbenezerYBekele@Gmail.com
Address: Eagan, MN
Linkedin: linkedin.com/in/abenezer-bekele
GitHub: github.com/AbenezerYBekele

PROFESSIONAL SUMMARY

Detail-oriented CS graduate with hands-on experience maintaining data quality, resolving inconsistencies, and building scalable validation workflows across relational database systems. Proficient in SQL, Python, and Excel. Strong record of data governance, NULL filtering, deduplication, and metadata management. Experienced working cross-functionally and communicating clearly with non-technical stakeholders. HIPAA-aware with a firm commitment to data confidentiality. No sponsorship required.

TECHNICAL SKILLS

- **Data Quality** Deduplication · record standardization · NULL filtering · data validation · metadata mgmt
- **BI & Reporting** Power BI (DAX) · Tableau · Excel (PivotTables, Power Query, VBA) · Jupyter Notebooks
- **SQL & Databases** PostgreSQL · MS SQL Server · MySQL · CTEs · Window Functions · Stored Procedures
- **Programming** Python (Pandas, NumPy, Scikit-learn) · R · JavaScript · Bash
- **Cloud & DevOps** AWS (EC2, S3, Lambda) · Docker · CI/CD · Azure DevOps · Git · Agile/Scrum

EDUCATION

University of Wisconsin – River Falls | River Falls, WI

- **Bachelor of Science in Computer Science and Information Systems | December 2024**
  Relevant Coursework: Database Systems, Data Science, Software Engineering, Object-Oriented Programming, Data Structure Algorithms

CERTIFICATIONS

- IBM data science professional certificate
- Docker Foundations Professional Certificate
- AWS Cloud Practitioner (In Progress)

WORK EXPERIENCE

Development Intern | A Better Road Foundation **2025**

- Gathered and documented business requirements from non-technical stakeholders; translated organizational goals into functional data and web solutions.
- Analyzed datasets using Google Analytics to surface KPI insights directly informing leadership decisions on content and email engagement strategies.
- Designed and deployed end-to-end web platform; built interactive data elements ensuring data integrity and a responsive user experience.
- Implemented SEO best practices and established scalable, repeatable web data reporting workflows for ongoing organizational use

PROJECTS

Relational Database Design & SQL Optimization (COVID-19) | GitHub

Excel, PivotTables, Power Query

- Authored 12+ complex SQL queries (Window Functions, CTEs, Self-Joins) transforming raw global health data into structured analytical views, replicating EDW data modeling workflows.
- Applied deduplication logic, NULL filtering, and record standardization; documented all data interfaces for auditability and cross-team handoff.

Business Intelligence: Power BI Dashboard Portfolio | GitHub

Power BI, DAX, SQL

- Built interactive KPI dashboards connected to live SQL databases, enabling real-time visibility into business performance metrics; designed DAX measures for trend analysis and pattern identification to support data-driven decision-making across business units.

Public Interest Data Pipeline: Chicago Urban Analysis | GitHub

Python, Pandas, Jupyter Notebooks

- Cleaned and normalized messy public datasets (socio-economic, education, population) to resolve inconsistencies and ensure downstream reliability across automated reporting modules.

Minneapolis Rental Licenses Time-Series Analysis | GitHub

R, ggplot2, dplyr, lubridate

- Analyzed local rental market trends using R, engineering date-based features to enable time-series analysis of license issuance patterns; created ggplot2 visualizations communicating seasonal patterns to support data-driven decision-making.
