PROFESSIONAL SUMMARY

Analytically driven Computer Science graduate with hands-on experience analyzing member interaction data, identifying friction points, and delivering actionable insights through dashboards and reports. Proficient in Excel, Power BI (DAX), SQL, Python, and PowerPoint. Proven ability to collaborate cross-functionally with UX, product, and operations teams, translate complex findings for non-technical stakeholders, and perform rapid root cause analysis. Experienced gathering and documenting business requirements and comfortable working in fast-paced environments. U.S. Naturalized Citizen — no sponsorship required

EDUCATION

University of Wisconsin – River Falls | River Falls, WI

- **Bachelor of Science in Computer Science and Information Systems | December 2024**
  Relevant Coursework: Database Systems, Data Science, Software Engineering, Object-Oriented Programming, Data Structure Algorithms

CERTIFICATIONS

- IBM data science professional certificate
- Docker Foundations Professional Certificate
- AWS Cloud Practitioner (In Progress)
- Google Data Analytics Professional Certificate (In Progress)

WORK EXPERIENCE

Development Intern | A Better Road Foundation **2025**

- Gathered and documented business requirements from non-technical stakeholders; translated organizational goals into functional data and web solutions , mirroring ODR intake and cross-team collaboration workflows.
- Analyzed member/user interaction datasets using Google Analytics to surface KPI insights, directly informing leadership decisions on content and email engagement strategy , analogous to Insights function analysis of call and chat feedback.
- Identified friction points in user engagement funnels and presented data-driven recommendations; served as sole technical liaison between stakeholders and the IS team throughout the project lifecycle.
- Built scalable, repeatable analytics reporting workflows (JavaScript/Velo) reducing manual processing overhead; established automated dashboards enabling continuous monitoring of user engagement KPIs.

TECHNICAL SKILLS

Analytics & Insights	Trend Identification, Root Cause Analysis, EDA, KPI Tracking, Data Mining, Statistical Analysis, Member Feedback Analysis
BI & Visualization	Power BI (DAX), Tableau, Excel (Pivot Tables, Power Query, VBA/Macros), Matplotlib, Seaborn, ggplot2, PowerPoint Reporting
Data & Databases	SQL (PostgreSQL, MS SQL Server, MySQL), CTEs, Window Functions, Stored Procedures, ETL/ELT, Query Optimization
Programming	Python (Pandas, NumPy, Scikit-learn, Matplotlib), R (Tidyverse, dplyr, ggplot2), JavaScript, Bash
Collaboration & Tools	Cross-functional Collaboration, Stakeholder Communication, Git/GitHub, Docker, Azure DevOps, Jira, Agile/Scrum
Monitoring (Familiar)	Google Analytics, Session Monitoring Dashboards, Web Engagement KPIs, Digital Funnel Analysis

ANALYTICAL PROJECTS

Business Intelligence: Power BI Dashboard Portfolio | GitHub

Power BI, DAX, SQL

- Built interactive KPI dashboards connected to live SQL databases, enabling real-time visibility into performance metrics for non-technical stakeholders , directly comparable to monitoring member interaction dashboards during product launches.
- Designed DAX measures for trend analysis, variance tracking, and pattern identification; performed end-to-end ETL including data cleansing, validation, and transformation with full documentation for cross-team handoff..

Retail Intelligence: Coffee Shop Sales Dashboard | GitHub

Excel, PivotTables, Power Query

- Analyzed large-scale transaction datasets to identify peak patterns, customer purchasing behavior, and product margin trends; engineered Macro-based KPI dashboards with PivotTables and charts for executive-ready reporting.
- Applied advanced data validation and Power Query transformations to ensure 100% accuracy in financial reporting; created reusable PowerPoint templates to relay findings clearly to business stakeholders.

Relational Database Design & SQL Optimization (COVID-19) | GitHub

SQL, MS SQL Server, CTEs, Window Functions

- Authored 12+ complex SQL queries using Window Functions, CTEs, and Self-Joins to transform raw global health data into structured analytical views for stakeholder reporting; performed root cause analysis on data inconsistencies. •
- Applied NULL filtering, data validation constraints, and strategic indexing to maintain high data integrity — replicating governance standards required in member data environments.

Minneapolis Rental Licenses Time-Series Analysis | GitHub

R, ggplot2, dplyr, lubridate

- Analyzed local rental market trends using R, engineering date-based features to enable time-series analysis of license issuance patterns across multiple years.
- Created ggplot2 visualizations communicating volume trends and seasonal patterns to support data-driven decision-making in a local market context.

Public Interest Data Pipeline: Chicago Urban Analysis | GitHub

Python, Pandas, Jupyter Notebooks

- Engineered a pipeline to ingest and clean diverse public datasets (socio-economic, education, population); developed automated reporting modules communicating demographic trend findings and friction points to nontechnical stakeholders.

Titanic Survival Prediction | GitHub

Python, Scikit-learn, Pandas, Matplotlib, Seaborn

- Performed end-to-end data wrangling handling missing values, feature engineering, and normalization to produce a clean, model-ready dataset.
- Built and evaluated classification models (Logistic Regression, Random Forest); developed visualizations to communicate survival patterns across demographics to non-technical audiences.
