PROFESSIONAL SUMMARY

Analytically driven Data Analyst with hands-on experience building dashboards, automating reporting workflows, and analyzing operational datasets to support business decision-making. Proficient in SQL, Tableau, Power BI, Excel, and Python for KPI tracking, trend analysis, process improvement, and ad-hoc reporting. Experienced collaborating with cross-functional stakeholders, translating business requirements into data-driven solutions, and communicating insights to non-technical audiences. Strong foundation in ETL, data validation, reporting automation, operational analytics, and continuous improvement initiatives. Skilled at identifying trends, optimizing processes, and improving data visibility through analytics solutions. U.S. Citizen, no sponsorship required.

EDUCATION

University of Wisconsin – River Falls | River Falls, WI

- **Bachelor of Science in Computer Science and Information Systems | December 2024**
  Relevant Coursework: Database Systems, Data Science, Software Engineering, Object-Oriented Programming, Data Structure Algorithms

CERTIFICATIONS

- IBM data science professional certificate
- Docker Foundations Professional Certificate
- AWS Cloud Practitioner (In Progress)
- Google Data Analytics Professional Certificate (In Progress)

WORK EXPERIENCE

Development Intern | A Better Road Foundation **2025**

- Gathered and documented business requirements from non-technical stakeholders and translated organizational goals into scalable data and reporting solutions.
- Analyzed engagement and operational datasets using Google Analytics to identify KPI trends, user behavior patterns, and process improvement opportunities supporting leadership decision-making.
- Built scalable reporting workflows and automated dashboard solutions using JavaScript/Velo, reducing manual reporting effort and improving operational efficiency.
- Served as the primary liaison between stakeholders and technical teams, communicating project updates, documenting requirements, and delivering actionable insights.
- Developed automated monitoring dashboards enabling continuous visibility into operational performance metrics and engagement KPIs.
- Identified workflow inefficiencies and recommended data-driven improvements to streamline reporting and improve data accessibility across teams.

TECHNICAL SKILLS

Analytics & Reporting	KPI Tracking, Dashboard Development, Operational Reporting, Ad-hoc Analysis, Trend Analysis, Root Cause Analysis, Data Mining, Statistical Analysis, Business Process Improvement, Reporting Automation, Stakeholder Reporting
BI & Visualization	Tableau, Power BI (DAX), Excel (PivotTables, Power Query, VBA/Macros), PowerPoint Reporting, Matplotlib, ggplot2
Data & Databases	SQL, PostgreSQL, MS SQL Server, MySQL, ETL/ELT, Data Validation, Query Optimization, Window Functions, CTEs, Stored Procedures, Data Governance
Programming	Python (Pandas, NumPy, Scikit-learn, Matplotlib), R (Tidyverse, dplyr, ggplot2), JavaScript, Bash
Collaboration & Tools	Cross-functional Collaboration, Stakeholder Management, Agile/Scrum, Git/GitHub, Docker, Azure DevOps, Jira, Technical Documentation

ANALYTICAL PROJECTS

Business Intelligence: Power BI Dashboard Portfolio | GitHub

Power BI, DAX, SQL

- Built interactive KPI dashboards connected to SQL databases, enabling real-time operational reporting and improved visibility into business performance metrics.
- Developed DAX measures for trend analysis, variance tracking, forecasting, and performance monitoring supporting data-driven decision-making.

- Performed end-to-end ETL processes including data cleansing, validation, transformation, and reporting automation to improve reporting consistency and efficiency.
- Optimized SQL queries and reporting workflows through indexing and stored procedures, improving reporting performance and reducing manual effort.

Relational Database Design & SQL Optimization (COVID-19) | GitHub

SQL, MS SQL Server, CTEs, Window Functions

- Authored 12+ complex SQL queries using CTEs, Window Functions, Self-Joins, and Stored Procedures to transform raw datasets into structured analytical reporting views.
- Conducted root cause analysis and data validation to improve reporting accuracy, data integrity, and operational reporting consistency.
- Optimized query performance through indexing and query tuning techniques, improving data retrieval speed for regional reporting processes.
- Applied governance standards including NULL filtering, validation constraints, and documentation of reporting workflows.

Retail Intelligence: Coffee Shop Sales Dashboard | GitHub

Excel, PivotTables, Power Query

- Analyzed operational sales datasets to identify peak demand periods, purchasing behavior trends, and product performance metrics supporting business planning initiatives.
- Developed automated KPI dashboards using Excel PivotTables, Power Query, and VBA to improve operational visibility and reduce manual reporting processes.
- Created executive-ready reports and visualizations communicating actionable insights to non-technical stakeholders.
- Applied advanced data validation and transformation techniques ensuring reporting accuracy and consistency.

Public Interest Data Pipeline: Chicago Urban Analysis | GitHub

Python, Pandas, Jupyter Notebooks

- Engineered automated ETL pipelines processing diverse datasets including socio-economic, education, and population data to support operational analysis and reporting.
- Cleaned and normalized large datasets improving data quality and reporting reliability for downstream analytics workflows.
- Developed automated reporting modules and visualizations communicating demographic trends and operational insights to stakeholders.
- Identified data inconsistencies and implemented validation processes improving analytical accuracy and reporting quality.
